```c
#include <stdio.h>

int main() {
    float height;
    printf("Enter the height of the person in centimeters: ");
    scanf("%f", &height);
    if (height < 150.0) {
        printf("The person is classified as: Dwarf\n");
    } else if (height < 165.0) {
        printf("The person is classified as: Average\n");
    } else {
        printf("The person is classified as: Tall\n");
    }
    return 0;
}
```
